

Iridium Announces Third-Party Apps for Iridium GO!(R), Growth of Application Developer Program

MCLEAN, Va., July 22, 2015 (GLOBE NEWSWIRE) -- Iridium Communications Inc. (Nasdaq:IRDM) today announced the availability of several mobile applications for Iridium GO!, a global smartphone-access device, designed to expand the utility of the unique device for its customer base. Growing the ecosystem of supported apps for users' personal smartphones and tablets, the new offerings will enhance functionality of the Iridium GO! for key markets, such as maritime, outdoor recreation, lone-worker safety and aviation. The specialized applications, created through the company's third-party application developer program by companies that include OCENS, PredictWind and two10degrees Ltd., are optimized to deliver the best possible experience over the Iridium® satellite network.

Iridium GO! provides global voice and text messaging for smartphone users as well as targeted additional data capabilities and connects to any Android or Apple iOS smartphone or tablet, providing connectivity anywhere on the planet for up to five devices. Designed with durability and mobility in mind, Iridium GO! offers one of the smallest form-factors in the industry, is made with a rugged, rubberized finish and is powered by a rechargeable battery.

Mobile apps that are currently available to support Iridium GO! serve a variety of distinct markets and now include:

[Grib Explorer Plus](#): Developed by OCENS, GRIB Explorer Plus melds GRIB weather and ocean data into detailed images carrying unparalleled insights into the environment around you.

[PredictWind Offshore](#): Developed by PredictWind, the world leader in wind forecasting, the Offshore App allows users to download PredictWind GRIB files, weather routing, departure planning, GMDSS text forecasts and satellite imagery for your next offshore passage.

[QWIP](#): Developed by OCENS, Quick Web Information Pulls (QWIP) pulls information on news, stocks, sports and more and cost-effectively delivers it to your device.

[GeoPro](#): Developed by RoadPost and two10degrees Ltd., GeoPro is a comprehensive lone-worker safety, monitoring and communication service that makes it easy to keep in touch with your workforce, and addresses even the most rigorous lone-worker legislative requirements.

[Flycast](#): Developed by OCENS, Flycast is an app for the aviation market that provides flight-specific aviation weather forecasts out 12 hours for any location on earth.

"The diverse range of apps being developed is driving interest in and adoption of the Iridium GO! and providing users with entirely new ways to benefit from the device," said Joel Thompson, vice president and general manager, terrestrial business unit, Iridium. "We're thrilled with the enthusiasm of the third-party developer community to create truly compelling applications for markets with such diverse needs, enabling entirely new use cases for Iridium GO! beyond what we originally envisioned."

Iridium is seeing continued growth of its application developer program, which now has more than 55 developers from various verticals designing apps that work with the Iridium GO! platform and the Iridium satellite network.

Iridium also announced an Iridium GO! firmware update, enhanced Iridium GO! app, and Iridium Mail & Web app which includes support for the latest Android 5.0 platform and higher, as well as enhanced browsing on Apple

iOS.

Iridium GO! is available for purchase through Iridium's partners and global distributors. For more information on Iridium GO!, go to www.iridiumgo.com. A full list of apps available for Iridium GO! can be found here: <http://www.iridiumgo.com/apps>. To become an Iridium GO! development partner, please email certify.apps@iridium.com or visit www.iridiumgo.com/apps to submit your inquiry for enrollment.

Forward-Looking Statements

Statements in this press release that are not purely historical facts may constitute forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. The Company has based these statements on its current expectations and the information currently available to us. Forward-looking statements in this presentation include statements regarding the development and capabilities of the Iridium NEXT constellation and the development, deployment and capabilities of applications for Iridium GO!. Forward-looking statements can be identified by the words "anticipates," "may," "can," "believes," "expects," "projects," "intends," "likely," "will," "to be" and other expressions that are predictions or indicate future events, trends or prospects. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of Iridium to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to, uncertainties regarding Iridium NEXT development and functionality, potential delays in the Iridium NEXT deployment, the development of and market for Iridium GO! applications, and the company's ability to maintain the health, capacity and content of its satellite constellation, as well as general industry and economic conditions, and competitive, legal, governmental and technological factors. Other factors that could cause actual results to differ materially from those indicated by the forward-looking statements include those factors listed under the caption "Risk Factors" in the Company's Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission ("the SEC") on February 26, 2015, as well as other filings Iridium makes with the SEC from time to time. There is no assurance that Iridium's expectations will be realized. If one or more of these risks or uncertainties materialize, or if Iridium's underlying assumptions prove incorrect, actual results may vary materially from those expected, estimated or projected. Iridium's forward-looking statements speak only as of the date of this press release, and Iridium undertakes no obligation to update forward-looking statements.
