

Iridium Certus(SM) Readies for Takeoff with Aviation Service Providers

MCLEAN, Va., Feb. 28, 2018 (GLOBE NEWSWIRE) -- Iridium Communications Inc. (NASDAQ:IRDM) announced today that Honeywell Aerospace, SKYTRAC, Avitek and Navicom Aviation are the first Iridium Certus service providers to be selected for the aviation industry. As Iridium Certus service providers, each company will be able to offer the new, best-in-class broadband satellite connectivity to its customers. Ideal for commercial airliner flight deck communications, rotorcraft and both flight deck and cabin business jet connectivity, Iridium Certus will soon offer the industry's fastest L-Band speeds. This will be delivered through small form factor, cost-effective antennas with the same reliable pole-to-pole coverage only provided by the Iridium® network.

A recognized leader in the aviation industry and long-time Iridium partner, Honeywell Aerospace products and services are found on virtually every commercial, defense and space aircraft. Honeywell Aerospace works to develop innovative solutions to increase aircraft efficiency, reduce pilot workload and improve passenger safety and comfort.

"Iridium Certus will extend Honeywell's vision for the Connected Aircraft by enabling high-speed data rates for all aircraft types operating anywhere in the world," said John Peterson, Honeywell's senior director of services and connectivity. "Combining the capabilities of the new Iridium constellation with GoDirect's Flight Services, Connected Maintenance, and Optimization Analytics will bring even greater operational efficiency for Honeywell's thousands of airline, military, business and commercial operators."

SKYTRAC provides performance trending, operations reporting, real-time asset tracking and situational awareness solutions to the aviation industry. SKYTRAC will extend Iridium Certus services to aviation partners as well as delivering the technology on their ISAT-200A hardware.

"Our mission is to drive flight safety and efficiency through streamlined air-to-ground connectivity. With its higher bandwidth, Iridium Certus will allow us to bring more power to recent innovations like real-time Health and Usage monitoring and weather to cockpit while also offering highest-quality voice services. SKYTRAC is proud to have been selected as one in a limited group of companies to offer Iridium Certus services direct to aviation clients," said SKYTRAC President, Malachi Nordine.

Based in China, Avitek is a leading aviation solutions company that provides onboard communications, ADS-B, ACARS and Electronic Flight Bag services. Avitek has been instrumental in equipping airliners throughout China with Iridium satellite communications devices to meet the Airline Operational Communications voice mandate by the Civil Aviation Authority of China. The introduction of Iridium Certus will allow Avitek to enhance the capability of the data solutions it offers and improve flight standards and operations as a result.

Navicom Aviation, based in Japan, is dedicated to the safe and efficient operation of aircraft. With a large number of helicopters in Japan serving public safety efforts for police and fire departments and the Japanese Coast Guard, Navicom plays a vital role in ensuring their aircraft stay connected. Navicom will provide the Iridium Certus service in support of their goal to help improve flight support systems for the overall aviation industry.

Enabled by the Iridium NEXT satellite constellation, Iridium Certus will bring broadband functionality, with enterprise-grade quality of service, to the aviation industry. It will feature a range of throughput and service options that will enable everything from graphical weather reports, multi-user internet/VPN and Very Small Aperture Terminal (VSAT) redundancy to flight data recorder streaming, video conferencing, and, upon formal approval, safety services. The Iridium Certus high-gain antenna (HGA) solutions will provide data speed options of up to 704 Kbps, and eventually as high as approximately 1.4 Mbps following full Iridium NEXT deployment, with an antenna size of approximately 24 x 10 x 6cm, while the low-gain antenna (LGA) solutions will enable data speeds of up to 176 Kbps.

"Iridium Certus is poised to introduce a revolution in aircraft communications," said Brian Pemberton, vice president strategic planning and general manager aviation at Iridium. "Iridium Certus leverages the inherent advantages of the Iridium network and architecture and combines that with enhanced capabilities of the Iridium NEXT constellation to redefine best-in-class aircraft connectivity. Iridium Certus not only satisfies the connectivity requirements for the flight deck but also serves as an ideal cabin connectivity solution for many business aviation users."

Initial flight trials will take place later this year, with Iridium Certus commercial service introduction expected in mid-2019 for aviation users. Commercial service introduction for other verticals, such as maritime and land-mobile, is planned for mid-2018. Iridium NEXT is the Company's next-generation satellite constellation. To date, there have been four successful Iridium NEXT launches, deploying more than half of the new constellation. Four additional launches are planned for 2018.

About Iridium Communications Inc.

Iridium is the only mobile voice and data satellite communications network that spans the entire globe. Iridium enables connections between people, organizations and assets to and from anywhere, in real time. Together with its ecosystem of partner companies, Iridium delivers an innovative and rich portfolio of reliable solutions for markets that require truly global communications. The company has a major development program underway for its next-generation network — Iridium NEXT. Iridium Communications Inc. is headquartered in McLean, Va., U.S.A., and its common stock trades on the NASDAQ Global Select Market under the ticker symbol IRDM. For more information about Iridium products, services and partner solutions, visit www.iridium.com.

Forward Looking Statements

Statements in this press release that are not purely historical facts may constitute forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. The Company has based these statements on its current expectations and the information currently available to us. Forward-looking statements in this presentation include statements regarding the deployment and capabilities of the Iridium NEXT constellation and products and services to be offered over the constellation, including Iridium Certus, as well as the potential market for such products and services. Forward-looking statements can be identified by the words "anticipates," "may," "can," "believes," "expects," "projects," "intends," "likely," "will," "to be" and other expressions that are predictions or indicate future events, trends or prospects. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of Iridium to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to, uncertainties regarding potential delays in the Iridium NEXT deployment, the development and functionality of Iridium NEXT and related products and services, and the company's ability to maintain the health, capacity and content of its satellite constellation, as well as general industry and economic conditions, and competitive, legal, governmental and technological factors. Other factors that could cause actual results to differ materially from those indicated by the forward-looking statements include those factors listed under the caption "Risk Factors" in the Company's Form 10-K for the year ended December 31, 2017, filed with the Securities and Exchange

REPORT for the year ended December 31, 2017, filed with the Securities and Exchange Commission (the "SEC") on February 22, 2018, as well as other filings Iridium makes with the SEC from time to time. There is no assurance that Iridium's expectations will be realized. If one or more of these risks or uncertainties materialize, or if Iridium's underlying assumptions prove incorrect, actual results may vary materially from those expected, estimated or projected. Iridium's forward-looking statements speak only as of the date of this press release, and Iridium undertakes no obligation to update forward-looking statements.
